

T-Safe from Telangana Police

India's first citizen-initiated police ride monitoring service

T-Safe Service Launched by Hon' C.M. TS*

Happy to inform that India's first Police ride monitoring service was launched today [12-Mar-2024] by Shri. A. Revanth Reddy, Hon' Chief Minister of Telangana in the presence of all cabinet members and senior police officials.

1. T-Safe is not an APP but a service.
2. A Smart Phone or pre-downloaded app is not a prerequisite to avail this service.
3. Hence, even if the woman has a basic phone, she can avail the T-Safe service by simply dialing 100 and choosing option 8 in the IVR to initiate ride monitoring.
4. Unlike most safety applications, that are SOS based, in T-Safe, emergency alerts get automatically triggered based on various scenarios.
5. Police monitor their journey and hence have the confidence that they are safe & in case any emergency arises, someone will respond
6. Service also available through an Android application (Travel Safe) and lite app on smartphone browser.
